

Training activity

SMARTPACK

02-05 September 2013

Organized by

Warsaw University of Technology

In the period 2-5 September 2013, Warsaw University of Technology, Warsaw Poland, partner in the SMARTPACK project have organized the training meeting in the frame of the SMARTPACK project, no.7-065/26.09.2012, **Smart functions of packages containing nano-structured materials in food preservation**, with the participation of the partners: Technical University of Cluj Napoca and Babes-Bolyai University, Cluj Napoca.

The theme of the training meeting is *Preparation and characterization of Au/TiO₂, Ag/TiO₂, Pd/TiO₂ composites.*

The training meeting includes a session of discussions about the current status of the SMARTPACK project with regard to the research work developed between March (last training activity) and September 2013 and the project ongoing research activities, such as:

CO – Technical University of Cluj Napoca, North University Center Baia Mare
- preparation of polypropylene based packages

P1 – Babes- Bolyai University - synthesis of the composites needed for packages preparation

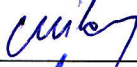

P2 - ICA Research and Development, Bucharest - starting the analyses on food

P3 – Warsaw University of Technology - synthesis of the composites needed for packages preparation

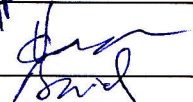

P4 – L&G Consulting SA Dej

- preparation and characterization (whiteness, tear and crack resistance, rough and porosity and thickness) of the paper based packages
